CAREER SUMMARY:

I am a java developer with commercial development experience.

I have experience in developing a web application for an online store that sells Indian goods around the world. The most modern technologies and libraries were chosen to create a competitive product.

I am a purposeful and self-confident person who works hard, studies and constantly improves my skills in order to achieve maximum goals and results. And now I am in search of new opportunities and development. I am sure that my skills and experience will help me to be a valuable player in my future company for a long time.
